Town Matric Higher Secondary School, Polur

Year: 2017

Percentage: 79%

PROJECT WORK

TITLE:

A NOVEL METHOD FOR HANDWRITTEN DIGIT RECOGNITION

Handwritten recognition helps computers understand handwritten digits like in the MNIST dataset. A web app lets users upload handwritten digit images. The model analyzes these images and shows the detected digit on the UI.

Technology Used : HTML5, CSS3, Python, Flask.

LANGUAGE

- Tamil
- English
